Skills
Operating Systems: GNU/Linux, Windows
Programming Languages: Java, JavaScript
Frameworks: React, Node.js, Angular
Databases: MySQL, MongoDB
Tools: Git, Sublime Text, Eclipse, Excel, VS Code

Work Experience
Software Developer, **Decimal Technologies Pvt. Ltd. - Gurgaon, India (DEC 2021 – Present)**
- Led the design and execution of the user experience interface, combining UI/UX strategy with practical designs.
- Collaborated with a team of developers in designing and implementing new software features, while also managing comprehensive documentation on platforms like GitLab and JIRA, reducing onboarding time by 15%.
- Leveraged the MVC design pattern to enhance bottleneck processes and focused on creating user-centric business solutions.
- Designed web interfaces that enhanced user engagement, leading to more efficient data collection. Employed best practices, such as the MVC pattern, to optimize data processing and ensure timely updates.
- Trained and guided junior developers, ensuring timely project deliveries and managed multiple projects concurrently for optimal performance.

Intern, Larsen & Toubro - Faridabad, India (Jan 2019 - Jun 2019)
- Engaged in project management activities, including planning, scheduling, and coordinating with cross-functional teams to ensure timely project delivery.
- Gained hands-on experience in software development, leveraging tools for data extraction, transformation, and loading (ETL).
- Assisted in data collection, preprocessing, and analysis, translating insights into actionable recommendations to drive project success.

Projects
E-commerce Store (React, Redux, HTML5, SCSS) (2023)
- Crafted an e-commerce platform with responsive and interactive UI, showcasing a wide array of product categories.
- Seamlessly integrated product listings, detailed views, and a dynamic shopping cart, leveraging fake APIs for an authentic experience.

Spotify Clone (React, Redux, HTML5, SCSS) (2023)
- Reproduced Spotify's intricate front-end, maintaining a 98% design accuracy.
- Utilized Redux for state management and integrated real-time data retrieval via the Spotify API.

Website Design (Angular 9, HTML5, SCSS) (2022)
- Pioneered the creation of dynamic UI components such as editable dropdowns, enhancing user interactivity.

Education
Bachelor of Technology - Symbiosis Institute of Technology (2016-2020)
- Member of the university's Tech Club, organizing and participating in various tech events and workshops.
- Successfully completed an intensive training program on Web Development and Design.
- Led a final year project on "Building Balance Techniques" using STAAD.Pro, which ranked in the top 3 out of 50 projects.

Full-Stack Development - Coding Ninjas (2020-2021)
- Achieved a proficiency certificate, top 5% performance in the cohort.
- Implemented responsive design and used React for the front-end, creating an intuitive user interface.
- Created an interactive and visually appealing music player screen using HTML and CSS.

Achievements
- Employee of the Quarter Award at Decimal Technologies for innovative solutions in project implementations.
- Recognized for outstanding creativity in developing a feature that enhanced the UX of an in-house software product.
- Geeks for Geeks Coding Challenge (2021) **-** Demonstrated coding expertise by solving problems across Basic, Medium, and Hard categories.
- Completed Artificial Intelligence Training in Data-Driven Science (Sep 2020) and Google Ads Search and Display certifications (Dec 2020 - Dec 2021)
